UNIVERSITÉ DE SHERBROOKE

## BACKGROUND

- Organizational Participatory Research (OPR) improves organizational practices
- Effective OPR processes and outcomes depend on high-quality partnerships
- No comprehensive framework or tool to assess quality of partnerships in OPR health

## OBJECTIVE

Develop a framework of the quality of partnership in OPR health

Photo by Mathias Jensen on Unsplash

## METHODOLOGY

Systematic Mixed Studies Review of OPR health questionnaires and framework synthesis with previous theoretical model

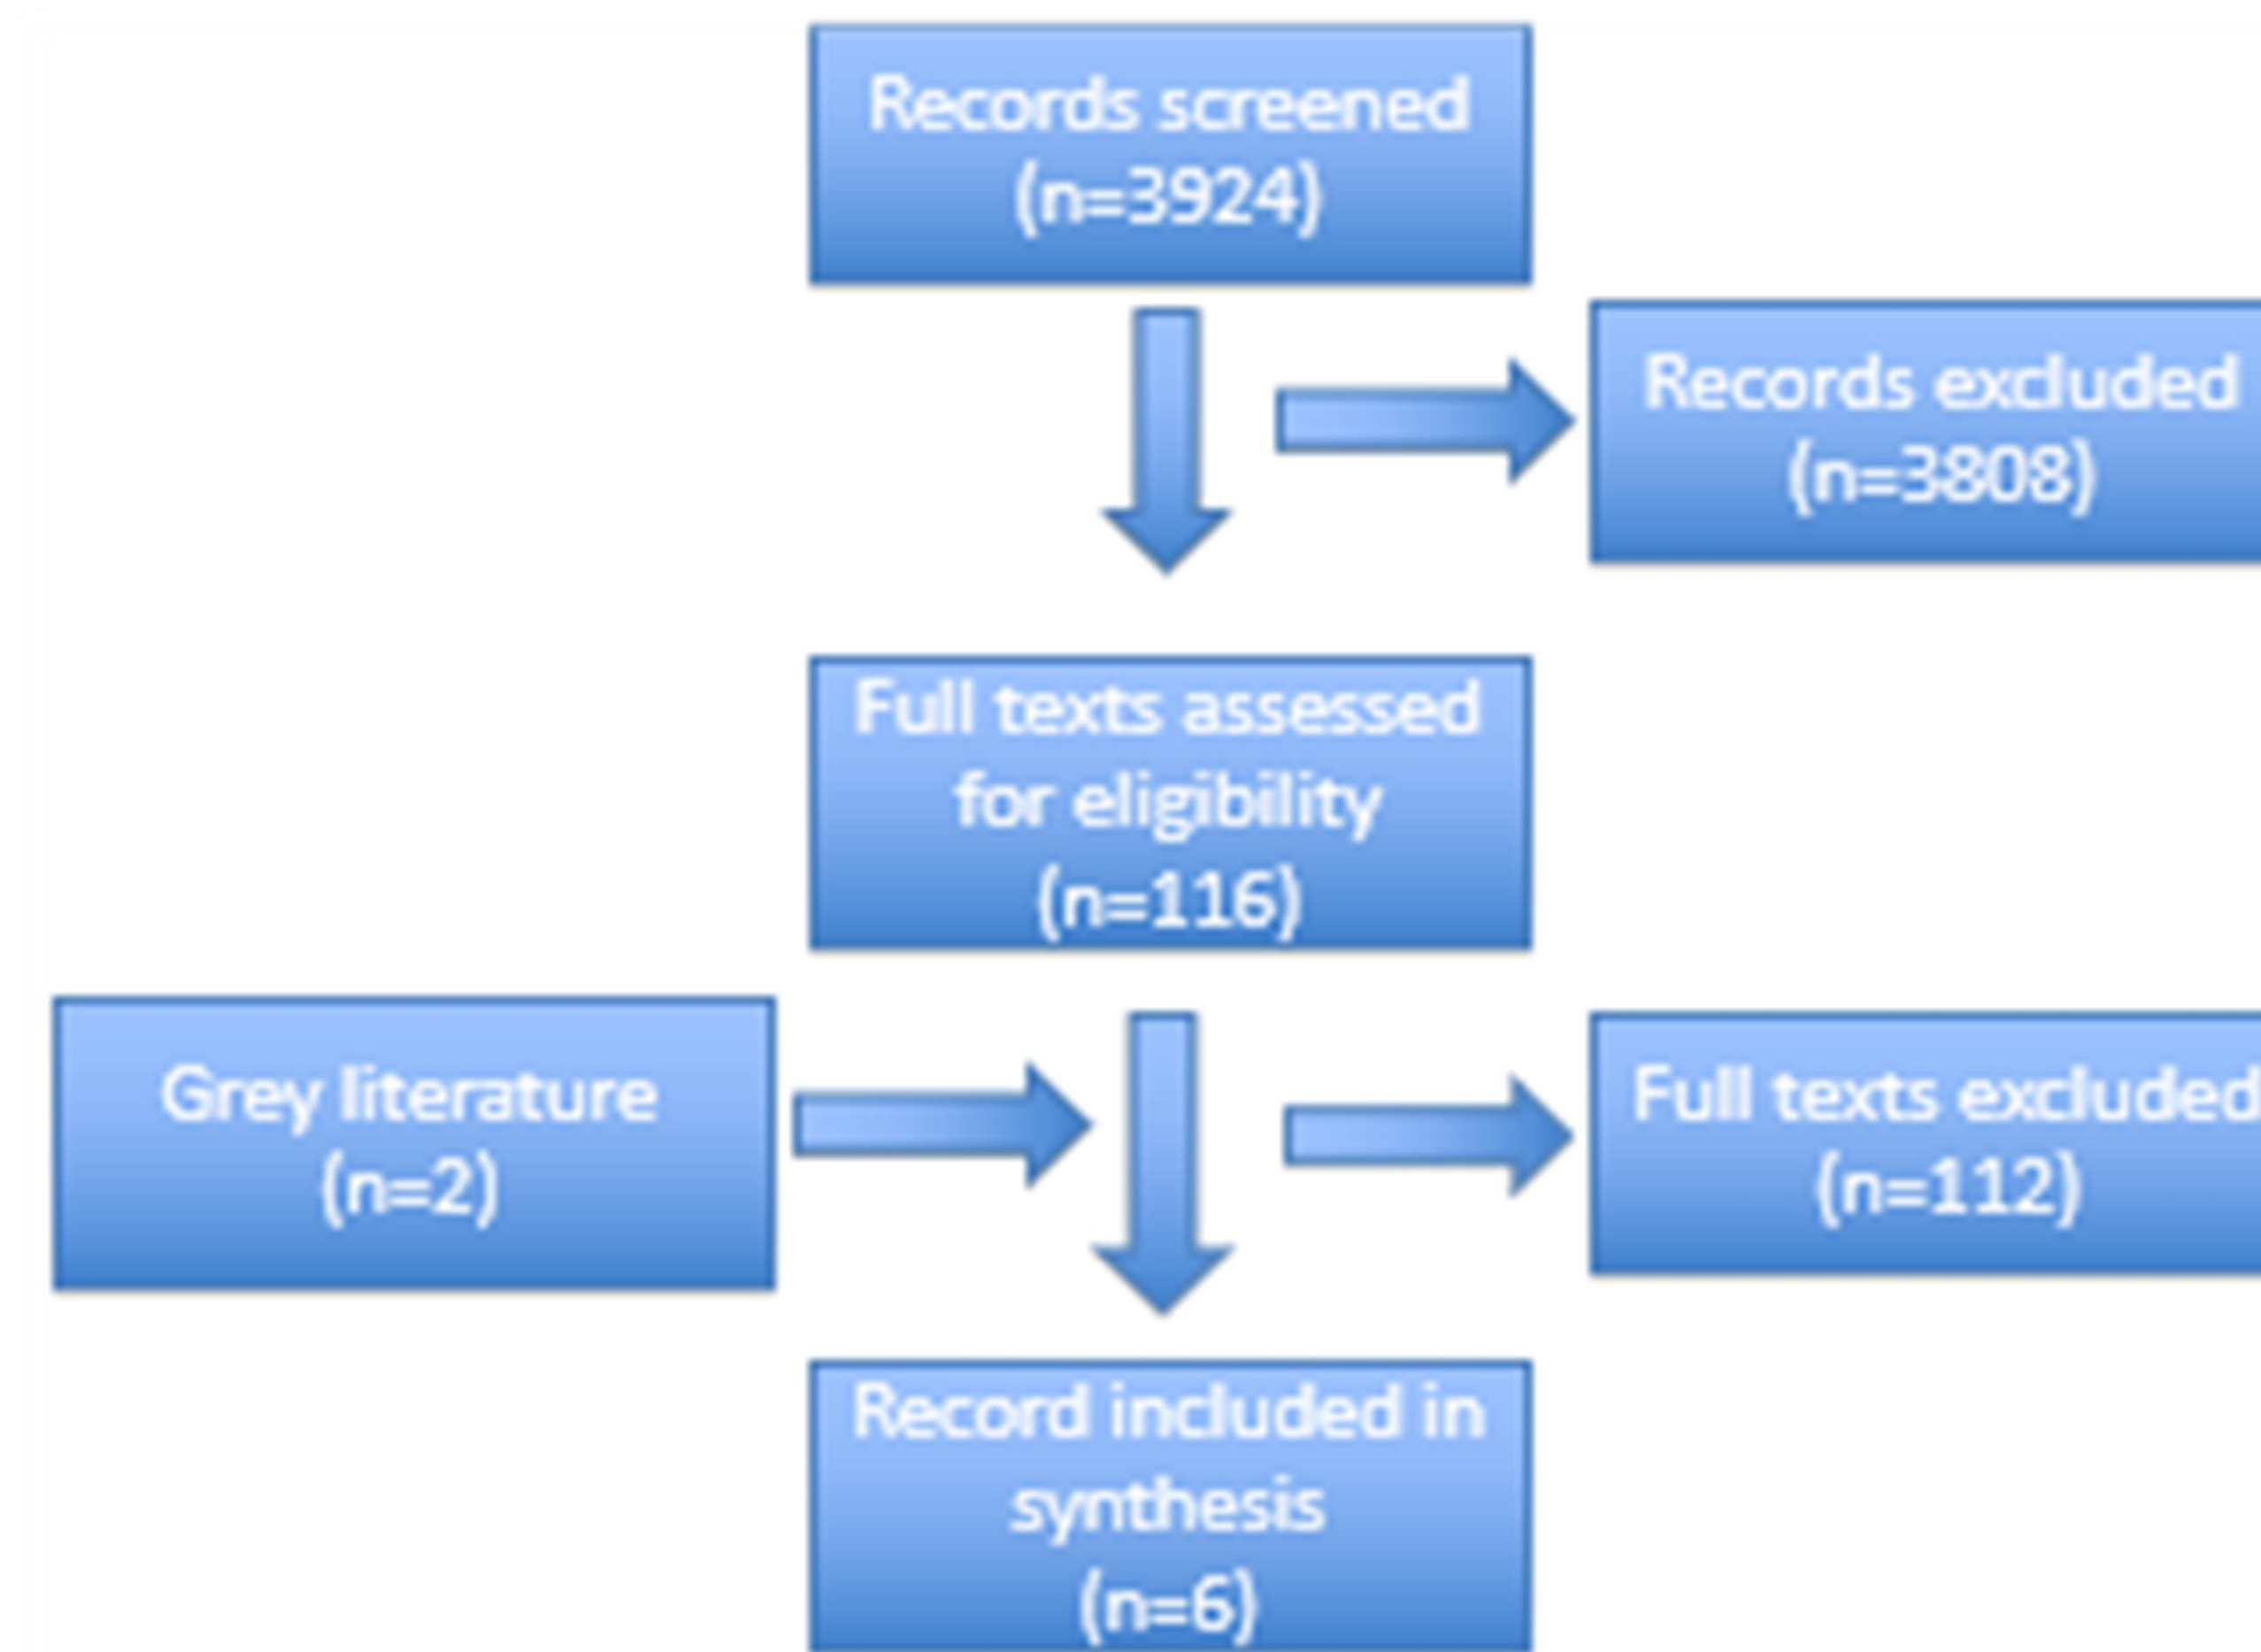

Fig 1. Flow chart

## RESULTS: Conceptual Framework (Figure 2)

Quality of Partnership theoretical framework will pave the way to future research for developing and validating a comprehensive method for assessing quality of OPR health partnerships

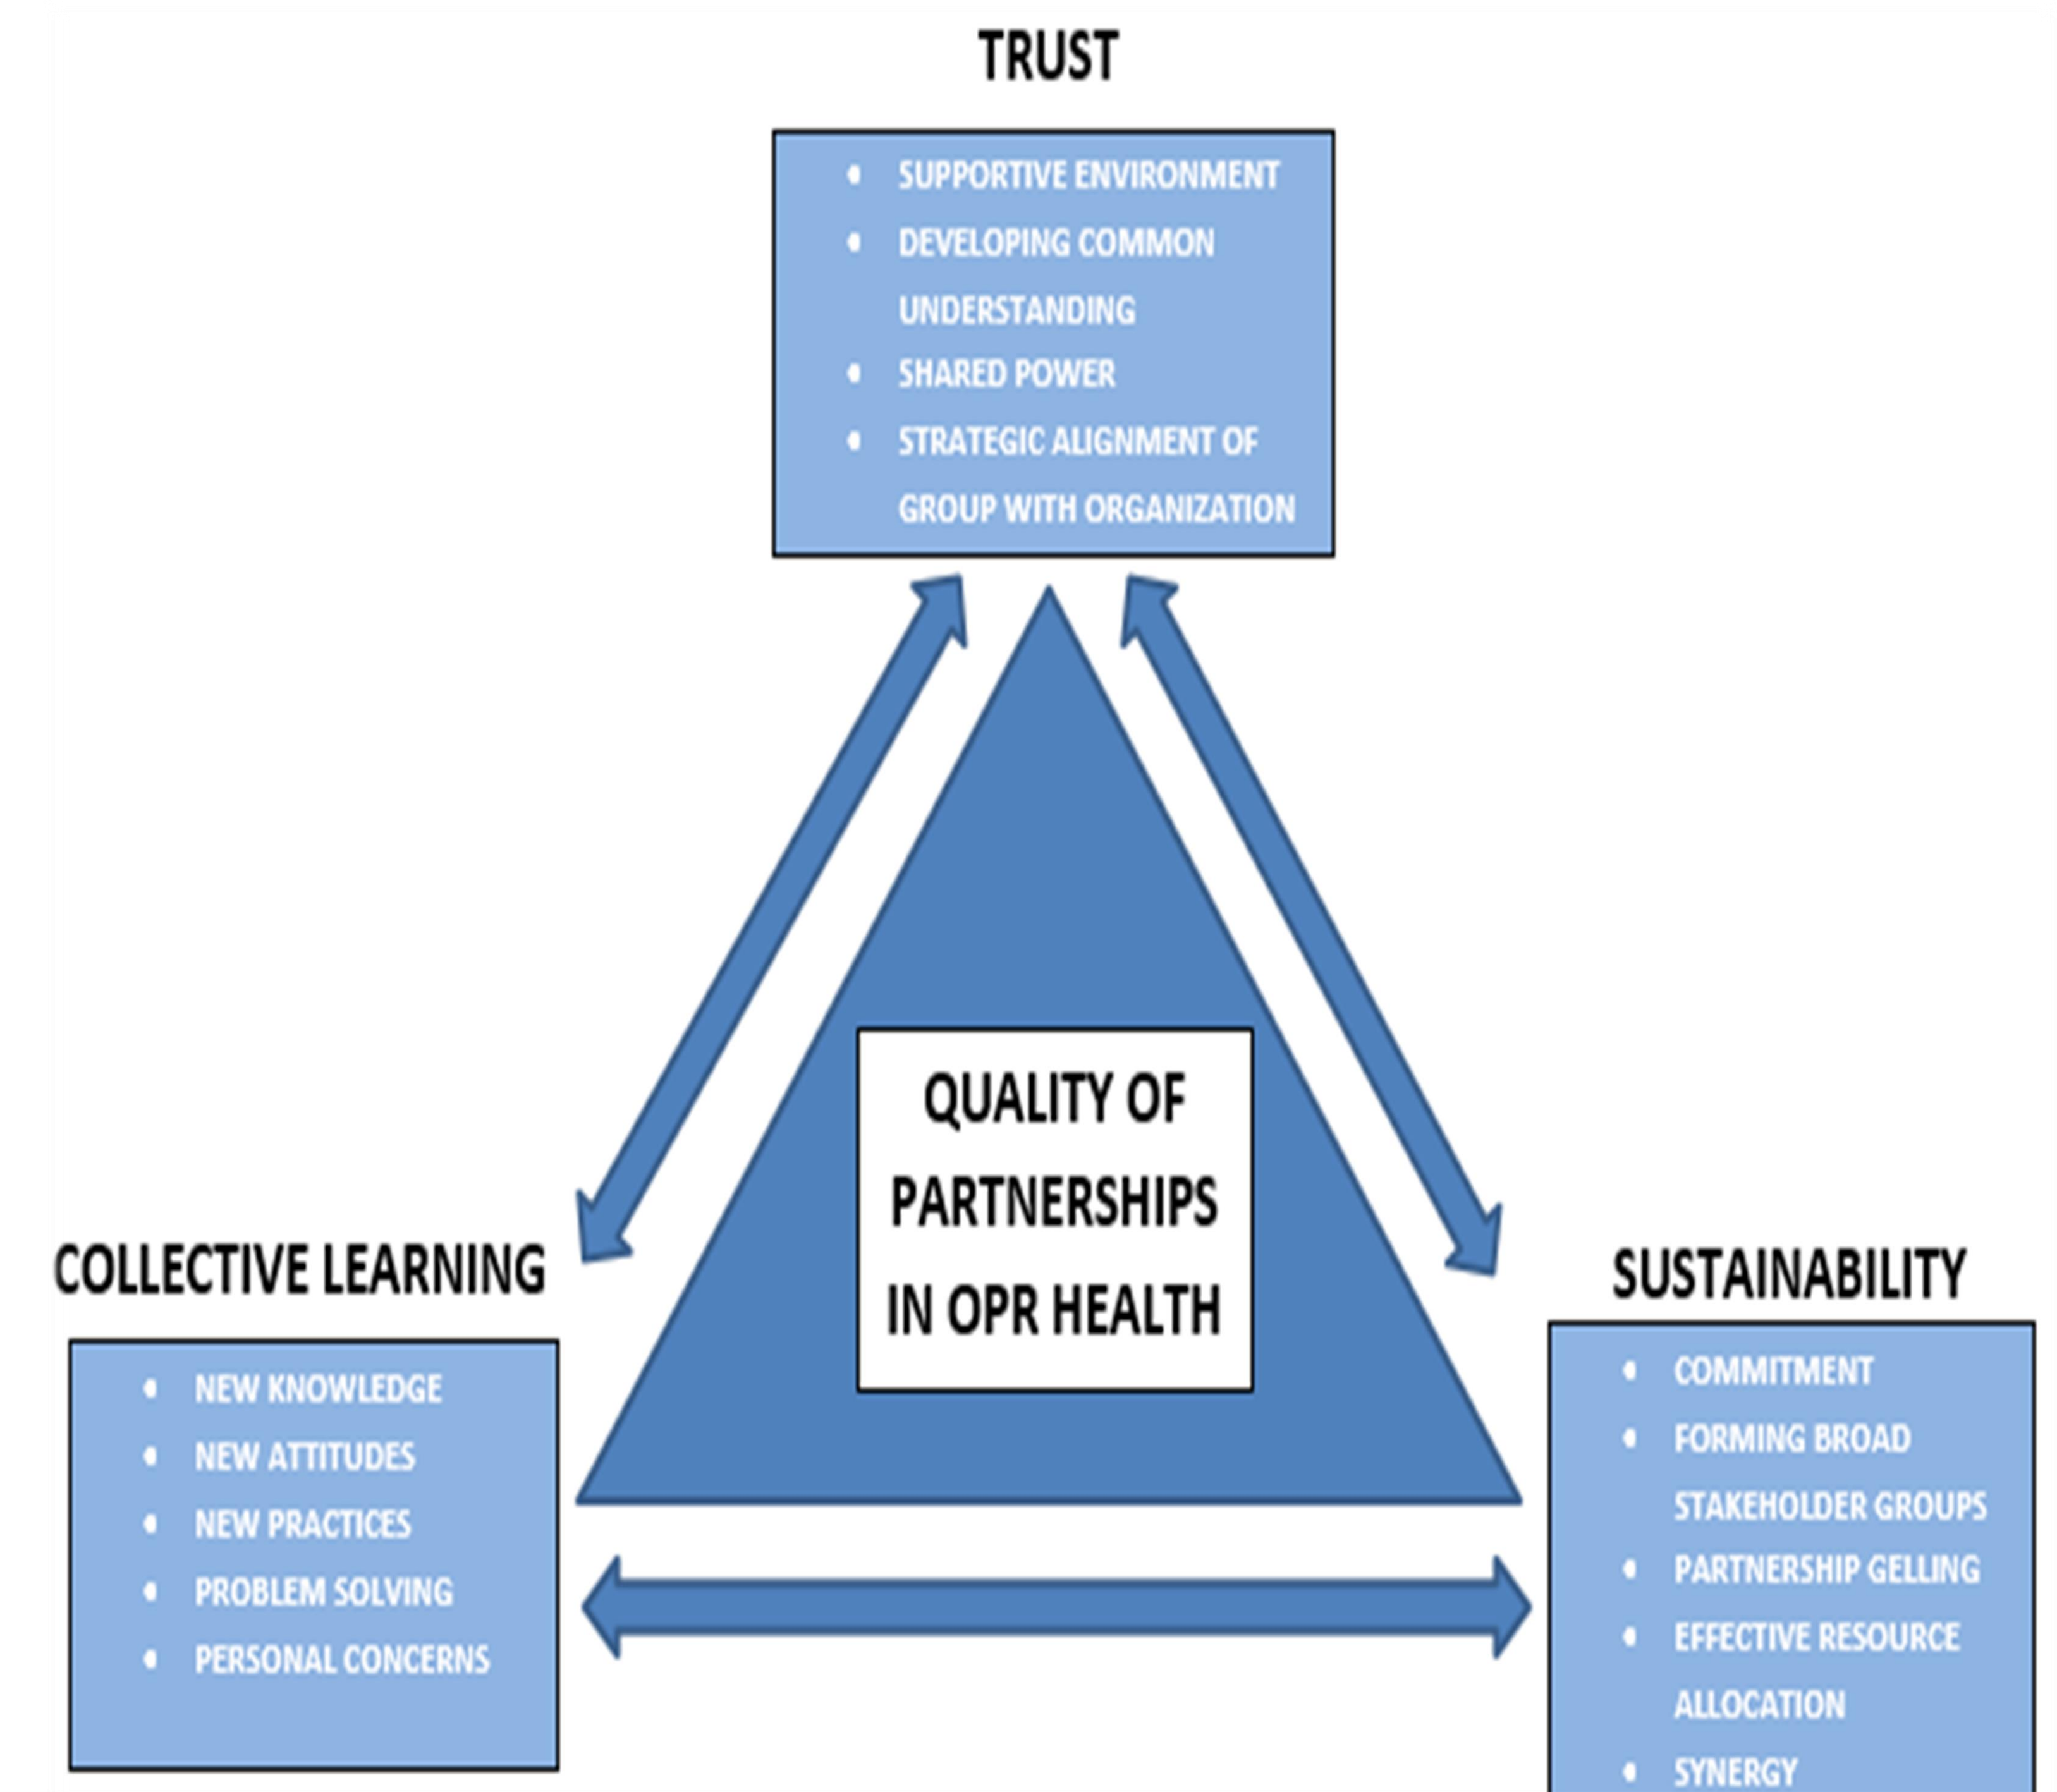

Figure 2. Quality of Partnership in OPR health Conceptual Framework
