

Building Research for Integrated Primary Healthcare

PRIMARY HEALTH CARE LEARNING SERIES

Join us to learn about research and quality assurance projects being conducted by the primary and integrated health care community.

Topic:

Innovative navigation programs to help individuals and families affected by life-limiting chronic illnesses navigate end-of-life: a realist evaluation

About the speakers:

Robin Urquhart

Dr. Urquhart is an Associate Professor and the Canadian Cancer Society (Nova Scotia Division) Endowed Chair in Population Cancer Research in the Department of Community Health and Epidemiology at Dalhousie University. She is also a Senior Scientist with the Beatrice Hunter Cancer Research Institute and an Affiliate Scientist at Nova Scotia Health. Her research interests include access to and quality of care, improving patient and family outcomes and experiences, and how we can more effectively move research evidence into clinical practice and healthcare policy.

Cynthia Kendall

Cynthia Kendall is a Project Coordinator at the Cancer Outcomes Research Program in the Department of Surgery at Nova Scotia Health. In this role, she supports research in a number of areas, including: cancer care, frailty, end-of-life care, and implementation science. Cynthia is also a PhD Candidate in the Interdisciplinary PhD Program at Dalhousie University. Her thesis research is focused on examining the factors affecting access to administrative health data for research in Canada.
